

# Customized Internet Solutions

Connecting your business is **OUR** business.

## Increase your Internet performance, bandwidth and resiliency with dedicated connectivity.

Dedicated Internet Access Service provides you with an exclusive and resilient link with symmetrical upload & download speeds and optimized for the fastest and most reliable connectivity available. Competitively priced and available across North America, including secure customer-direct and peering transit ties around the globe. Future Link is proud to leverage our premier partnerships to provide this service to your doorstep.

Available across the continent, our networks provide direct peering connections with all of the major Cloud Service and Tier 1 transit carriers. This ensures that your Cloud-based applications are seamless, with high reliability, low latency and near-instantaneous response times.

## Competitive Advantages

<b>Network Reliability</b>	Get a dependable Internet connection equipped with an industry-leading Service Level Agreement (SLA) that guarantees network availability & data packet deliveries ensuring your critical applications are always online and responsive.
<b>Performance Consistency</b>	With a network designed with scalability to support peak bandwidth use, you can count on consistent and reliable performance, 24/7/365. We boost capacity to avoid congestion when networks reach predefined thresholds that typically affect client performance.
<b>Dedicated Internet</b>	With no sharing, 100% of your bandwidth is dedicated exclusively to you so that your neighbours' internet activity will never saturate or degrade your performance.
<b>High Performance</b>	Carrier-grade, high-performing, dedicated network connectivity with hundreds of transit peers at all major internet exchange facilities world-wide.

# Key Features of Dedicated Internet Access

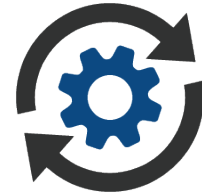

## Maximum Upload / Download Speeds

Maximize performance with dedicated symmetrical Ethernet access, providing equal upload and download speeds, avoiding bottlenecks.

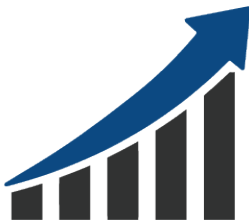

## Forward Thinking

Our network is designed with the highest levels of security which supports current and emerging technologies, including IPv6.

## Managed Services

For simple, reliable and secure local network management, our IT experts provide fully managed IT services and enterprise-grade network equipment giving you confidence and peace of mind.

## Future Scalability

With carrier class Ethernet options up to 100 gigabits per second (100GBps) you can scale your broadband quickly and easily as your company's needs grow.

## Resilient Connectivity

Through geographically segmented networks and data centers, enjoy Internet connectivity with redundant and diversified traffic routing options.

Contact a Future Link professional to learn how to put the power of Dedicated Internet Access to work for your company. We've got you covered.
